Candy Corn Catapult

Name: _____ Date: _____

Directions: Your task is to create a working catapult using any materials you can find to use and a spoon for the launcher. The catapult will be used to launch a piece of candy corn.

Before you begin designing your catapult, sketch a few plans to try out in the space below.

Candy Corn Catapult

Once you have a working catapult, begin testing it by measuring how far it will launch your candy corn. Make any changes as needed to your catapult during the trials.

Trial Number	Distance Candy Corn Traveled
Trial #1	
Trial #2	
Trial #3	
Trial #4	
Trial #5	

During the trials, what changes did you make to your catapult? If no changes were made, explain why you made the decision to keep your design the same.

Using your data to support you, how successful was your catapult design?

This resource was created by Jennifer Findley. It may be printed and photocopied for single classroom use. It may not be put on the Internet, sold, or distributed in any form. Check out my store for more resources for grades 3-5.
