

GOOGLE SLIDES ACCESS

1. Make sure you're logged in under the Google Account that you want to use the file with, which is most likely your school account.
2. Click on the text in the table to access the files. The webpage will ask you to **make a copy**. By default, Google Drive will save your copy in your main drive, not a folder.

CLICK HERE FOR GOOGLE SLIDES ACCESS

3. I recommend you make a master copy of the file and organize it in a folder so that you have it to access later on. This is helpful if you plan to only assign a few pages at a time to students in Google Classroom.
4. **Some of the activities have several versions so make sure you read through each carefully before deciding what to assign your students.**
5. Each page contains text boxes for students to type their answers into.
6. To assign students pages from the Google Slides file, make a copy of your master. (You can do this by right-clicking on the file, or while the file is open, going to FILE > MAKE A COPY.)
7. Rename your new copy. Delete any pages you don't want to assign.
8. If you're using the file with Google Classroom, **make sure you make a copy for each student**. Otherwise, all of your students will be editing the same copy.
