

# DETAILS TO SUPPORT REASONS

Personal Experience: When I was younger, I was very irresponsible and may have gotten injured playing in such a house.

Research: Research shows that more accidents happen in unsafe situations.

Emotion: Imagine how you would feel if you were a child and you were peer pressured into playing in a creepy house?

Examples: For example, children could find broken bottles that could harm them or others.

This resource was created by Jennifer Findley. It may be printed and photocopied for single classroom use. It may not be put on the Internet, sold, or distributed in any form. Check out my store for more resources that are common core aligned.
